

Raigo Hõim

IT-SYSTEMS SPECIALIST

I graduated as an IT Systems Specialist in the summer semester 2022. I am young, eager to learn and not afraid of new challenges. I'm currently in training to learn the basics of Java and Python programming languages, and I'm still learning MySQL. I have been involved in a project: setting up and managing a Google workspace, creating a website. I am looking for a job in the IT sector as a system administrator, software tester or programmer.
